+5% spend → +15% revenue. Efficiency from reallocation, not more money.

A laptop screen is shown in a dark, dimly lit environment. The screen displays a performance dashboard with several key metrics at the top: '2500', '1.51 Sec', '2,500', '4,567', '2,315', and '7,325'. Below these metrics is a line graph with multiple data series. A green checkmark icon is visible on the right side of the graph area. The text 'End of Report' is overlaid in large white font across the center of the screen.
